

# COVID-19 Convalescent Plasma Program: Donors Needed!

## Because of You, We Can Fight COVID-19

Vitalant is collecting plasma from people who have recovered from COVID-19. Called “convalescent plasma,” it contains antibodies to the SARS-CoV-2 coronavirus, which can be given to patients currently fighting COVID-19. Together, we can save lives.

## To be eligible, you must have had COVID-19 symptoms plus:

- A prior laboratory diagnosis of COVID-19, either by a positive nasal/oral swab test OR a positive test for SARS-CoV-2 antibodies requested by your health care provider
- Complete resolution of symptoms for at least 28 days
- Meet all other donor eligibility for an automated plasma donation

Blood donors are NOT tested for coronavirus. Do not donate blood if you are sick.

Are you a potential donor who has completely recovered from COVID-19? To get started, fill out the form at:
