Give Convalescent Plasma to Help Fight COVID-19

Find your nearest convalescent plasma donation location by visiting Vitalant.org/COVIDFree

TO BE ELIGIBLE, YOU MUST HAVE HAD COVID-19 SYMPTOMS PLUS:

- A prior laboratory diagnosis of COVID-19, either by a positive nasal/oral swab test OR a positive test for SARS-CoV-2 antibodies requested by your health care provider
- Complete resolution of symptoms for at least 28 days
- Meet all other donor eligibility for an automated plasma donation

WHAT IS GIVING PLASMA LIKE?

A convalescent plasma donation is a specialized process in which Vitalant uses a machine that separates and collects just your plasma. The remaining components are safely returned to the donor. It takes approximately 30 minutes longer than a whole blood donation.
